Day 5 Masai Mara Game Reserve Sumptuous breakfasts then we depart for a full day adventure. We are right in time for the greatest spectacle on earth; the eighth wonder of the world – the wildebeest migration. From July to October, the fields are awash with thousands of wildebeests that yearly migrate from the Serengeti National park in Tanzania to Maasai Mara in search of pasture. They cross the Nile crocodile invested Mara River. Tens of them drawn in the ranging waters, others are captured and killed by the giant crocodiles. The wildebeests are closely followed by Burchell's zebras and impalas. Predators too in their hundreds also follow and lay in wait for those animals that become weak or incapacitated during the long journey for a kill.. Be on the look-out for the big five that Maasai Mara is famous for. These include the lion, savannah (African) elephant, the Cape buffalo, the leopard and the black rhino. In the early 20th century, Kenya was a famous hunting destination. Killing any of the big five game one pride, a sense of class, a feeling of heroism. We may even be so lucky to witness a leopard or a cheetah sprint and make a kill! We return back to the camp for dinner and overnight. **Ashnil Mara Camp LDBB**

OPTIONAL ACTIVITY: Balloon Safari over the Mara plains followed by a champagne breakfast or visit a traditional Masai Manyatta (off the beaten track) and experience the culture of this world famous community. The Masai still live as they did for centuries - interact with these nomadic people and experience their way of life as you learn about their customs and traditions.

Our guide driver will help you through the immigration procedures. We arrive in Serengeti in time for an exciting game viewing drive in one of the BEST game parks in Tanzania. Covering an area of 14,763 square kilometres, the world famous Serengeti National Park is Tanzania's oldest park, and one of the world's last great wildlife refuges. It stretches as far as Lake Victoria to the West. Its name comes from the Maasai word Siringet, meaning 'endless plains'. The Serengeti ecosystem supports the greatest remaining concentration of plains game in Africa, including more than three million large mammals. Dinner and overnight at our lodge. **Serengeti Sopa Lodge LDBB**

Day 7 Serengeti National Park Breakfast then we depart with picnic lunch boxes on a game-viewing drive towards Central Serengeti. OPTIONAL ACTIVITY: Dawn Balloon Safari over the Mara Plains ending with a champagne breakfast.

Day 8 Ngorongoro Conservation Area Breakfast then we depart for Ngorongoro. We stop at the Oldupai Gorge, one of the most important prehistoric sites in the world to learn on human evolution. We will enjoy an on-site talk on the interpretation of the gorge by the resident guide. We arrive for check in, thereafter lunch. This afternoon just relax and enjoy the panoramic views of the crater below, the largest unbroken caldera in the world. It has been described as one of the great natural wonders of the world. Eight million years ago, the Ngorongoro Crater was an active volcano but its cone collapsed, forming the crater that is 610 meters deep, 20 kilometres in diameter, and covers an area of 311 sq. km. Spectacular as it is, the crater accounts for just a tenth of the Ngorongoro Conservation Area. The crater is home to many species of wild game and birds. With the exception of impala and topi (due to fierce competition with the wildebeest) and the giraffe (because there is not much to eat at tree level), almost every species of African plains mammal lives in the crater, including the endangered black rhino, and the densest population of predators in Africa. A strange thing is that the crater elephants are mainly bulls! The birdlife, which includes the flamingo, is mainly seasonal, and is also affected by the ratio of soda to fresh water in Lake Magadi on the crater floor. Dinner and overnight at your game lodge.

NOTE: Warm jacket/cardigan is highly recommended.

Ngorongoro Sopa Lodge LDBB

Day 9 Ngorongoro Conservation Area After breakfast descend some 600 metres into the crater, which is home to an abundance of wildlife and a photogenic paradise, for a full day of game-viewing drive with picnic lunch at a private scenic site. Prides of lions, herds of Cape buffalo, impala, Thompson gazelles, rhino, golden & black-backed jackal, zebra, cheetah, leopard and the spotted hyena. Unmatched for its natural variety & breath-taking beauty, there are few places on earth where such a tremendous diversity of landscapes exist inside a region this size. Apart from its wildlife riches, the crater is also of great archaeological importance, with the remains of some of mankind's earliest ancestors discovered in the area, also a home to hundreds of bird species, refreshing in the small lakes in the crater floor. We drive back to our game lodge for dinner and overnight. **Ngorongoro Sopa Lodge LDBB**

Day 10 Tarangire National Park Breakfast then we set off to Tarangire national park; which of all Tanzania parks boasts of the largest number of savannah elephants. We will be warmly ushered in for check-in, then lunch at our game lodge. This afternoon is the moment we have been waiting for. We depart on a game viewing drive in the vast, wildlife-rich game park. Herds of up to 300 elephants scratch the dry Tarangire river bed for underground streams, while migratory wildebeest, zebra, buffalo, impala, gazelle, hartebeest and eland crowd the shrinking lagoons. It's the greatest concentration of wildlife outside the Serengeti ecosystem - a smorgasbord for predators – and the one place in Tanzania where dry-country antelope such as the stately fringe-eared Oryx and peculiar long-necked gerenuk are regularly observed. The swamps, tinged green year round, are the focus for 550 bird varieties, the most breeding species in one habitat anywhere in the world. On drier ground you may find the Kori bustard, the heaviest flying bird; the stocking-thighed ostrich, the world's largest bird; and small parties of ground hornbills blustering like turkeys. Other birds include the yellow-collared lovebird, drabber rufous-tailed weaver and the ashy starling – all endemic to the dry

savannah of north-central Tanzania. Dinner and overnight at our lodge. **Tarangire Sopa Lodge LDBB**

Set in rolling savannah scenery, it is dwarfed by the presence of the pink-tinged, snow-capped peak of Mount Kilimanjaro, the highest free-standing volcanic mountain in the world and topped by one fifth of all the ice in Africa. Her breath-taking scenery - one of the best places for a photogenic view of Mount Kilimanjaro; weather permitting is next to none. Dinner and overnight. **Amboseli Sopa Lodge LDBB**
